

Point-3 Kitchen Video

Intelligent Order Packing System for Casio & Point-3 POS

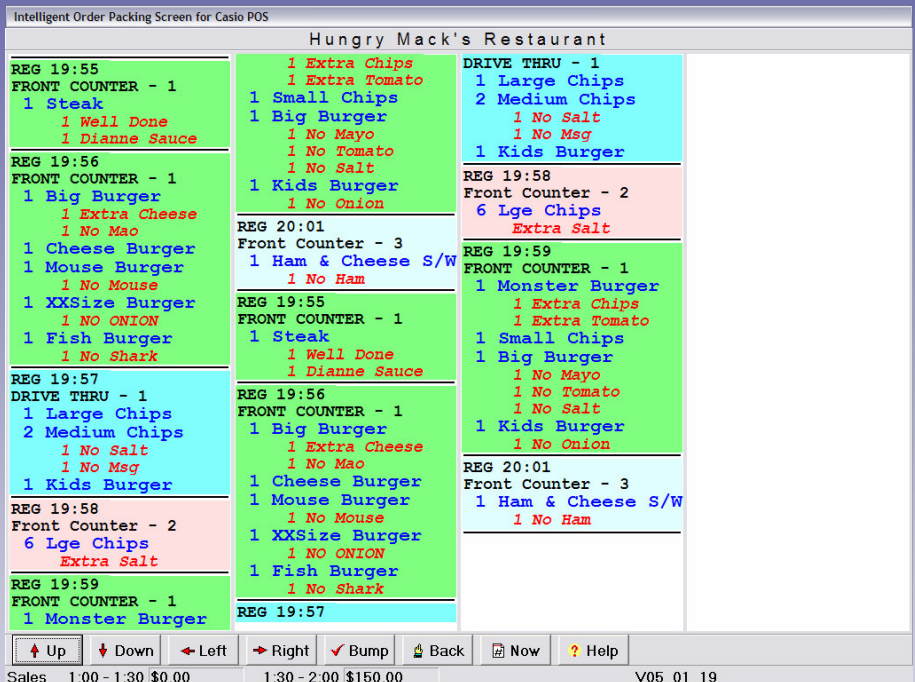

Sick of printers in your kitchen running out paper and orders getting lost? Say goodbye to it all with Point-3 Kitchen Video. Instead of a printer docket, view your orders on a computer screen then bump them off when you are finished.

Features:

- Bump complete orders or one item at a time
- View orders after they have been bumped
- Use different colours and fonts to distinguish between orders from different terminals
- Wide range of optional information can be displayed
- Can be used with either a touch screen or programmable keyboard for bumping orders

Requirements

- Windows 98/ME/2000/XP
- Minimum of 400Mhz Processor
- Minimum of 128MB Ram
- Casio Communicating ECR or POS Terminal such as: CE-7000, TK-6000, TK-7000, TE-4000F, TE-8000F, QT-2100 etc

Casio QT-2100 POS Terminal

Touch Screen Terminal
