Built upon success for the Hospitality Industry

QT-6100

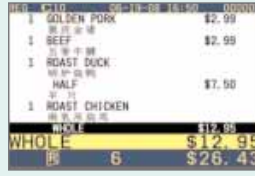

Next Generation of Flash ROM Touch for Hospitality

Building upon the success of the QT-6000, Casio has developed the QT-6100. Designed as an affordable solution for price conscious customers desiring the advantages of a stable flash ROM touch screen system for their business.

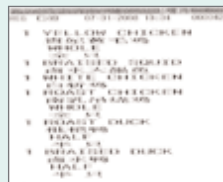

Boasting a high-resolution 12.1" flat panel, TFT, color LCD display that magnifies the clarity and the detail of graphic images assigned to keys so operators can easily identify items. The fast 10/100 Base TX Ethernet network guarantees that information passed between terminals, such as floating guest checks, credit card information and sales report data, will be quick and reliable.

Central Site Operation

The QT-6100 provides the ability for multi-site owners to connect to each store location from a central site via a high-speed/internet connection. The QT-6100's FTP communication capability allows a store owner to send and receive program and sales files from a remote location to a central site reliably, quickly and cost effectively. High-speed/internet polling is also available using Casio's polling, maintenance and reporting software packages PCX-1000 and CAS Lite.

Expansive Features

The feature set of the QT-6100 covers all areas of the hospitality industry. Features like:

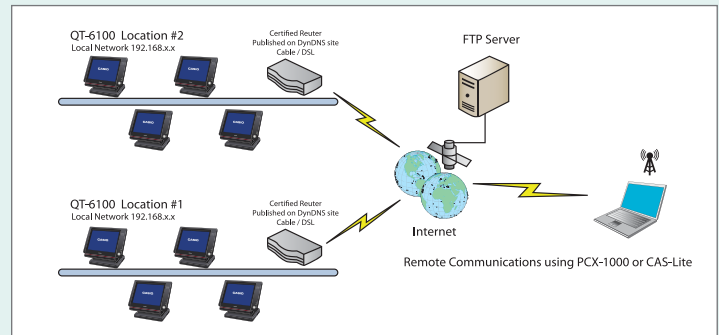

- Automatic Mix & Match discounting • Time & Attendance
- Drive-Thru functionality • Graphical Split Check screens
- Graphical Table screens • Integrated Credit Cards
- Charge Tipping • Assigning customer names to table buttons
- Adding checks together simply
- Color-coding of table buttons to easily identify the status of a table
- Electronic Journal to search and print out particular transactions
- Extensive server reporting • And more....

The QT-6100 can meet the needs of many. All of this without the need of a Windows operating system or hard drive. The QT-6100 offers functionality found on higher priced PC-based systems but with the stability and reliability of a cash register terminal.

The three (3) serial ports provide multiple connectivity to various peripherals, such as receipt printer, kitchen printer and/or monitor, scanner, scale, credit/debit/gift device, coin dispenser, liquor dispenser, remote customer display and video surveillance, allowing your system to expand to meet the needs of your business.

Various Applications

The QT-6100 lends itself to various applications that includes Quick Service, Table Service, Bars and Cafeterias. The QT-6100's unique multi-lingual descriptor capability allows different language printing to the kitchen printers. Chinese, Vietnamese, Spanish and French description can be printed to the kitchen, the customer receipt and even on the operator display along with the English description.

Optional Magnetic Stripe Reader

Optional Dallas Key – Server Sign-on & Macro Activation

External Remote Display
